RE: Tuolumne River 2007-2008 FERC Article 37 Flow Schedule for P-2299

Dear Fishery Agency representatives:

A letter dated April 18, 2007, and pursuant to the 1996 FERC Order, Amended Article 37, contained the initial flow schedule for the April 15 through May 31 period of the current Fish Flow Year, encompassing the spring pulse flow period. That schedule was established using the April 10 DWR forecast update for the San Joaquin Basin 60-20-20 Index.

The DWR May 22, 2007 60-20-20 San Joaquin Basin Index forecasts were 2.025183 for 50% exceedence and 1.908183 for 90% exceedence. Those latest indices correspond to annual volumes of 118,339 AF and 114,518 AF respectively, based on interpolation above the applicable basin index threshold.

An interim flow schedule for the remainder of the fish flow year using 117,335 AF (attached) was provided to you by e-mail from Wes Monier on May 18 and we will proceed to use that schedule as of June 1. We will see if further schedule adjustments become necessary as the forecasts and runoff continue. The final annual fish flow year volume will not be available until August when the basin index is finalized.

If you have any questions, please contact Wes Monier at 209-883-8321.

Sincerely,

Robert Nees
Assistant General Manager
Water Resources and Regulatory Affairs Administration

C: Larry Weis - TID
Allen Short - MID
Phylis Posey – FERC Secretary
